DETAILED ACTION

This is a continuation application of a prior application Serial Number 09/446,169, now abandoned, which is a national stage application based on a PCT application PCT/GB97/01881. The preliminary amendment filed concurrent with the application canceled original claims 1-33 and added new claims 35-110. Accordingly, claims 34-110 are currently under consideration.

The present national stage application lacks unity of invention under 37 CFR 1.475:

Group I. Claim 34, drawn to a cartridge for use in an ink-jet printer, classified in 347, subclass 86.

Group II. Claims 35-110, drawn to a method for producing a screen printing stencil, classified in class 101, subclass 128.4.

The inventions are distinct, each from the other because:

The claims of these two groups are directed to different inventions which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding "special technical features". In particular, the method steps for producing a screen printing stencil as recited in group II are not at all required in group I. Similarly, the cartridge recited in group I is not required in group II.

Applicant is advised that the response to this lack of unity of invention requirement to be complete must include an election of the invention to be examined even though the requirement be traversed(37 CFR 1.143). See MPEP 1893.03(d).
